

Iceland Web Client User Management

Accessing the Web Client

For the Iceland the web client will be accessed from each of the 820 stores via a unique URL. The uniqueness will be defined by appending of the site key in the form SXXXX.

<https://cloud.monika.com/iceland/index.php/dashboard/region/3/site/S1553>

Log in behaviour

The user should be automatically logged in on a guest account. This will have viewing permissions only, allowing the system to be navigated and viewed, but not allow any alert management.

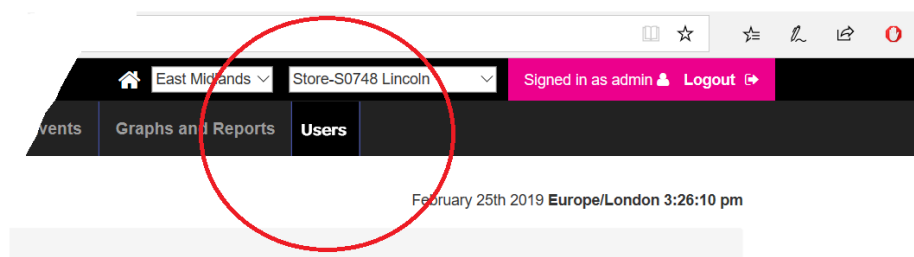

Alert and Critical Events Management

When the user selects any dialogue to acknowledge, add an action, comment or sign off, they will need to be presented with an authentication dialogue to select a user and enter a password. After authentication the user with higher permissions they can perform whatever action they intended. This user will then be logged out after 10 mins.

User Management

There is a requirement for the managers to administer their own users. A suitable dialogue is shown below.

User Tab

User Dialogue

The screenshot shows the 'Users' page in the Monika dashboard. The breadcrumb trail is 'Dashboard / East Midlands / Store S0748 Lincoln'. The page displays a table with the following data:

Name	Username	Delete User	Edit User
Andy Brown	ABROWN	Delete User	Edit User
Richard Green	RGREEN	Delete User	Edit User
Sarah Brown	SBROWN	Delete User	Edit User

Below the table is an [Add User](#) button. The top navigation bar includes 'Dashboard', 'Live Monitoring', 'Tasks', 'Alerts', 'Critical Events', 'Graphs and Reports', and 'Users'. The user is signed in as 'admin'.

Edit User

The screenshot shows the 'Edit User' modal open for the user 'Andy Brown'. The modal contains the following fields:

- Full Name:
- Username:
- Passphrase:

At the bottom of the modal are 'Close' and 'Confirm' buttons. The background shows the same 'Users' page as the previous screenshot, but with a grey overlay.
