

# Iceland Web Client User Management

## Accessing the Web Client

For the Iceland the web client will be accessed from each of the 820 stores via a unique URL. The uniqueness will be defined by appending of the site key in the form SXXXX.

## Log in behaviour

The user should be automatically logged in on a guest account. This will have viewing permissions only, allowing the system to be navigated and viewed, but not allow any alert management.

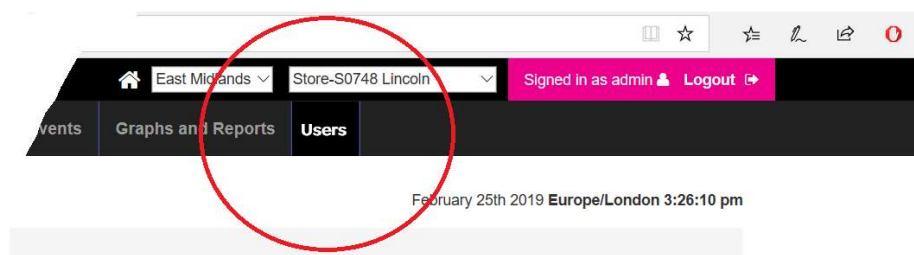

## Alert and Critical Events Management

When the user selects any dialogue to acknowledge, add an action, comment or sign off, they will need to be presented with an authentication dialogue to select a user and enter a password. After authentication the user with higher permissions they can perform whatever action they intended. This user will then be logged out after 10 mins.

## User Management

There is a requirement for the managers to administer their own users. A suitable dialogue is shown below.

## User Tab

## User Dialogue

The screenshot shows the 'Users' page in the Monika dashboard. The page has a dark navigation bar with the following menu items: Dashboard, Live Monitoring, Tasks, Alerts, Critical Events, Graphs and Reports, and Users. The current user is 'Signed in as admin' and the location is 'Store-S0748 Lincoln'. The main content area displays a table of users with columns for Name and Username. Each user row has 'Delete User' and 'Edit User' buttons. An 'Add User' button is located at the bottom left of the table.
